A very successful tag day was held on Saturday the 25th for the St. John Ambulance sponsored by Mrs. E. Tricker, Mr. Hugh Isaac and the Boy Scouts. \$56.53 was collected. We wish to thank all those who gave so generously to this worthy cause. We are sure that the St. John Ambulance will be greatly pleased with the results of the Tag Day.

Mrs. M. Levins and Mrs. S. Cadman were weekend visitors at the home of Mr. and Mrs. C. Cave

Mrs. Bernard Stubbart Sr. is receiving treatments on her knee at Edmonton.

Mrs. Hein of Calgary is visiting at the homes of her brothers, John, Chris and Fred Harsch.

Clean up day was held at our local park on Wed., June 29th, so come along, folks and enjoy our park and swimming pool and bring your lunches with you. Tables and benches are all over the park for your convenience.

Mr. and Mrs. Leonel Hay of Bay City, Michigan are visiting at the home of Mrs. C. O. Martin.

Corporal and Mrs. James Graham and children are visiting at the home of Mr. and Mrs. Chas. Graham. James Graham is stationed at Sea Island near Vancouver with the R.C.A.F.

Mr. and Mrs. Julius Ohlhauser were Carbon visitors this week at the homes of their relatives the Harschs and Ohlhausers.

Mrs. Henry Jerome and son Bobby of Prince George, B.C. are visiting at the home of her parents, Mr. and Mrs. C. Graham.

Carbon Fish and Game held their Annual Trophy Shoot June 23rd. The trophy was won by Wray Wright. The scores, based on 50 shots, were as follows:
Wray Wright 48, G. W. Schell 44, Les Bramley 44, Dusty Poxon 42, G. Eslinger 38, I. W. McCracken 38, Bill Gibson 35.

Scores made by none trophy entries, based on 25 shots, were as follows: Ted Schmidt 19, C. C. Diede 17, Leo Ohlhauser 17, A. Schell 16, G. E. Schell 16, Dr Milne 5.

Mr. and Mrs. Flint and boys of Penhold were weekend visitors at the home of Mrs. E. MacAlpine. Mr. Flint is stationed at Penhold with the R.C.A.F.

Several of our younger citizens have recently celebrated a birthday and all have held nice birthday parties with a great number of smaller friends. Robin Hunt and Larry Poxon had their 6th birthday and Eric Milne celebrated his 7th birthday.

Manitoba crop outlook good except in the flooded areas

The crop outlook is promising in Manitoba, except in the flooded areas or where moisture is in excess, according to the Manitoba department of Agriculture, in its report for the period ending May 30.

Planting is well advanced to almost completed, depending on the district, says the department. Wheat seeding may be said to be finished, while some oats and barley remain to be planted. In the earlier districts, farmers have delayed seeding in order to destroy weeds—especially wild oats, which have germinated freely this

spring. Much of the flax remains to be seeded.

Serious flooding

Of major concern has been the serious flooding of the Assiniboine river. From the Manitoba boundary eastward all valley land is flooded and none is expected to be seeded. In the Poplar Point-Oakville area a considerable acreage, estimated tentatively at 100,000 acres, is under water and unlikely to be cropped. A portion of this land on the south side of the river has been seeded, however.

Morden is the only point needing more rain. Elsewhere, moisture ranges from ample to excessive. Growth to date is very promising. With minor exceptions, wintered-over crops have come through well, while there has been almost an absence of soil drifting. The sweet clover weevil is general.

Sugar beet contracts total 22,500 acres, with over 200,000 acres planted. With favorable weather, the balance should be planted within a week. Early May plantings are well up and ready for cultivation. Recent rains have helped germination.

The main concentration of field peas this year centres on Portage la Prairie, where planting has been retarded by unfavorable weather and excess moisture. Elsewhere, planting is farther advanced.

Unfavorable conditions

The anticipated increase in acreage to sunflowers failed to materialize with rather less than 15,000 acres now expected, as compared to 20,000 last year. Very unfavorable planting conditions in the Gunton-Arborg area will account for a marked reduction in rape seed. Shelled corn plantings will compare with those of a year ago.

The outlook for canning crops is promising. The acreage seeded to peas will likely show a marked increase, while corn will be about the same at last year. Early planted peas have made a splendid start.

Cattle marketings from January 1 to mid-May were down 13 percent compared to a year ago, whereas hog marketings showed a 37 percent increase. Swine erysipelas has been more prevalent than for some years. The lamb crop shows improvement compared to 1954.

Butterfat production in May showed a marked increase compared to a year ago, accounted for by more cows being milked and earlier than usual pastures.

Egg production has been holding at a high level with the peak now past. Quality has been satisfactory. The demand for poultry meats has been brisk, looking after current offerings. Chick hatchings are down 25 percent compared to a year ago, while turkey poulters are comparable.

Despite late arrival of many bee packages, colonies are generally in good condition and building up well.

Fashions

S-o-o slimming!

4554
14½-24½

by Anne Adams

Half Sizers! Need a pretty new dress for summer? Sew this in a jiffy! It's proportioned to fit the shorter, fuller figure perfectly—no alteration worries with this smart step-in style! And so flattering—those side-swept lines just whittle the inches away!

Pattern 4554: Half Sizes 14½, 16½, 18½, 20½, 22½, 24½. Size 16½ takes 4½ yards 35-inch fabric.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to:

Department P.P.L.,
Anne Adams Pattern Dept.,
60 Front Street W., Toronto.

You can't go
ALL-OUT

If you feel
ALL-IN

These days most people work under pressure, worry more, sleep less. This strain on body and brain makes physical fitness easier to lose—harder to regain. Today's tense living, lowered resistance, overwork, worry—any of these may affect normal kidney action. When kidneys get out of order, excess acids and wastes remain in the system. Then backache, disturbed rest, that "fired-out" heavy-headed feeling often follow. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys to normal action. Then you feel better—sleep better—work better. Ask for Dodd's Kidney Pills at any drug counter.

Funny and Otherwise

Seven Scotsmen, all fellow workers, made a mutual agreement whereby one of them would buy the paper each day and read it at lunch hour to the other six.

For this they paid him each a penny. The paper cost him three cents, so he made three cents profit. And the other six, in effect, saved their eyesight and two cents apiece.

Irish corporal: "That's how 'twas the bullet went in me chest and came out me back."

Newsman: "But how did it miss your heart?"

Irishman: "Me heart was in me mouth."

Asking a woman her age, is like buying a second hand car; the speedometer's been turned back, but you can't tell how far.

The rider of a bronc at the rodeo was having a tough time of it hanging onto the bucking steed. The animal, while tossing about wildly, caught his foot in a stirrup. The rider was heard to mutter, "All right, if you're getting on, I'm getting off."

A man, upon arrival of a new heir in his household, placed two cigar boxes on his desk. The one box was full of cigars, and bore a hand-painted sign reading "It's a Boy! Help Yourself!" The next cigar box was empty. The accompanying sign read: "It's the 6th one. Help me! All donations gratefully received."

A colored man was brought before a police judge charged with chicken stealing. He pleaded guilty and received sentence. Then the judge asked how it was he managed to lift those chickens right under the window of the owner's house when there was a dog in the yard.

Negro: Hit wouldn't be of no use, jedge, to try to 'splain dis thing to you all. If you was to try it, you like as not would get your hide full o' shot an' git no chicken nuther. If you want to engage in any rascality, jedge, you better stick to de bench, whar yo' am familiar.

HEALTH OF THE MIND

Illness of the mind, like illness of the body, varies in degree of seriousness. Some forms are deep seated, requiring long and intensive treatment, while other forms, if diagnosed in their earliest stages, may be controlled quickly and, in many cases, cured by a few weeks' treatment in a special ward of a general hospital. The important thing is to have a doctor's advice on the first symptoms of mental disturbance.

APRIL SHOWERS!

ROCKY MOUNTAIN HOUSE, Alta.—This town in the foothills of the Rockies had more snow in April than it had all winter. In three weeks of that month 43 inches fell.

Honey production down in 1954

Twenty-five percent less honey was produced in Canada in 1954 than in the previous year. This was the smallest honey crop on record since the year 1926. Approximately 26 million pounds of honey was produced in 1953 and only about 20 million pounds in 1954.

Due to unfavorable weather conditions average yields per colony in 1954 dropped to a low of about 59 pounds as compared with a per colony production of around 77 pounds in 1953. Contrary to production figures the number of Canadian beekeepers increased in 1954 by approximately 1,000. This brought the total up to slightly under 15,000 beekeepers, with 339,700 colonies.

TALL STRUCTURE

A 26-story building, the tallest structure in West Germany, is now under construction at Ludwigshafen. It will be approximately 288 feet high.

Home Workshop

The cooking surface for this barbecue is twenty inches high with the top divided equally for boiling on a solid plate and grilling at the same time. Hooks for utensils and working spaces are provided at the sides with a rack in the back for storing fuel. Except for sixteen fire bricks ready made concrete blocks of standard sizes are used throughout. For permanent construction a foundation slab six inches thick made with a rich mixture of concrete is recommended. Pattern 426 will be very useful in making one of these barbecues as it shows each step from preparing the slab to pointing up the spaces between blocks, with large three dimensional sketches. Price of pattern is 35c.

The side rails and ends of this bed are bolted together at the corners. Use standard single or double coil, link or box springs. If Hollywood type is preferred simply omit the footboard and make headboard about twice the height as the one shown in the sketch. The pattern gives dimensions for both types. Usually the high headboard is slip covered with quilted fabric or padded, then covered with leatherette and decorated with brass or chrome upholstery tacks. A storage unit with four linen trays and a blanket compartment may be used with this bed. Pattern 383 is used for making the head unit. The patterns are 35c each.

U.S. migrants sought by Australia; hope for 20 million population by 1980

Sydney harbor bridge is called by immigrants Australia's "Statue of Liberty" —Central Press Canadian.

By ARTHUR SCHOLETS
(CPC Correspondent)

SYDNEY, Australia.—The Australian government has launched an immigration scheme to attract settlers from the United States.

The government will contribute \$85 toward the passage money of each migrant, and a pro rata amount toward the fares of children.

Single women aged 18 to 30, single men 18 to 35, married couples up to 45 without dependent children, married couples up to 50 years with dependent children will be accepted. There is no limit on the size of family groups.

The scheme is part of the drive to increase Australia's population to 20 million by the year 1980. The present population, as revealed by last year's census, was 9,200,000 people, about the same as the number living in the Greater New York area.

Australia with a total area of 2,974,581 square miles is nine-tenths the size of the United States, which has a population of 163 million.

It is estimated by immigration authorities that 10,000 Americans, including many ex-GIs have settled in Australia since the war.

More than one million settlers have come to Australia since the end of World War II. Half of these have come from the United Kingdom, and the majority of the others from Poland, Italy, Greece, Holland and Germany.

This year Australia has set a target of 115,000 migrants. The American migrants are expected to number less than one-half of one percent of the total.

Australian government officials

hope that 500 Americans will become eligible for migration before the end of the current financial year, June 30.

Americans and other migrants coming to Australia see the steel outline of Sydney's giant harbor bridge glistening in the sunshine beckoning to a new life Down Under.

They call the bridge "Australia's Statue of Liberty" because it is visible for miles at sea on ships approaching Sydney's famous harbor.

The bridge is the largest single span constructed in the world. It was finished 23 years ago at a cost of \$23 million.

Americans to be eligible for the benefits of the migration scheme must be of European descent and able to comply with the usual requirements of health, character and security check.

Consideration will be given to applicants irrespective of their trade or calling. If private accommodation in Australia is not available, temporary accommodation will be provided.

Because of the preponderance of males in the Australian population, the Australian government is anxious to bring more single women migrants to Australia.

Under the migration scheme the new settlers are being encouraged to bring out their wives and fiancées with assisted passages. The woman shortage in Australia is a desperate problem in the northern part of the country.

In Darwin, the capital of Northern Territory, a correspondence club has been formed to help lonely men find wives. The latest census shows that there are 4,000 surplus bachelors in Northern Territory, more than 1,000 of them in Darwin.

The correspondence club will advertise in American, British and continental newspapers and magazines for women pen-friends for the men.

Men in the north of Australia are drawing big wages from the uranium mines, oil exploration and

the boom in the export of beef. Single women who go to work at office jobs in Northern Territory seldom complete six months service—the majority are married before they have been there half this time.

Americans migrating to Australia will land at the port of their selected state. They will be met by immigration officials and taken to an immigration centre.

The migrants will remain there until a job is found for the breadwinner of the family. If he is unable to find private accommodation after getting a job, the family will be allowed to live in the centre.

Australia at present has the lowest unemployment in the world, with less than 5,000 receiving government relief cheques.

The government labor bureau has 100,000 jobs unfilled. These are mainly skilled jobs in the steel industry, automobile assembly and engineering, building, trade, chemical industry and electronics, and aircraft engineering and production.

The scheme to encourage American settlers is not covered by any bi-lateral agreement with the United States government.

"It is simply an offer made by the Australian government to contribute toward the passages of migrants from certain countries," said the immigration minister, Harold Holt, at a recent citizenship convention in Canberra.

Other nationalities eligible for the same benefits as Americans are settlers from Denmark, Norway, Sweden, Finland and Switzerland.

LAUGH MACHINE

A laugh machine, which produces everything from a giggle to a guffaw when the appropriate key is pressed, has been produced for use as accompaniment to television shows. Its "funny bone" is a series of tape-recorded audience laugh reactions.

Alaska has less than one-third the area of Canada's Yukon and Northwest Territories and about seven times their population.

One doctor for every 948 Canadians survey shows

OTTAWA.—There is one doctor for every 948 Canadians, according to a report released recently by Hon. Paul Martin, minister of National Health and Welfare. Mr. Martin made public a "Survey of Physicians," carried out by his department's research division and dealing statistically with the medical profession.

The minister noted that although Canada had an all-time high of 16,031 active doctors as of June 1954, there has been little change in the ratio of doctors to population. Canada, however, continues to stand high among the countries of the world in respect to the supply of doctors.

First direct approach

The survey, conducted in the spring of 1954, was the first direct approach by the department of National Health and Welfare to Canadian physicians. Successful completion of the survey was due to the co-operation of the physicians themselves, directly, and through their professional organizations, particularly the Canadian Medical Association and l'Association des Medecins de Langue Francaise du Canada.

Quebec, Ontario and British Columbia have been better supplied with doctors than the rest of the provinces for many years. But according to the survey, British Columbia now has the lowest provincial ratio recorded, with one doctor for every 777 persons.

Especially notable was the increase in the number of women doctors in the past 30 years. Last year Canada had 638 female physicians—about four percent of the total active civilian supply. In 1921 women doctors formed only 1.7 percent of Canada's doctors.

Concentration of doctors in

urban centres has continued in the post war years, the 1954 survey indicated. In 1947, 70.8 percent of Canada's physicians were located in centres of 10,000 or more. By 1951 the proportion had risen to 73.2 percent and in 1954 it stood at 73.7. Provincial variation in 1954 was between 44.1 percent for Newfoundland and 78.7 percent for Ontario.

Specialization trend

The trend towards specialization also continued. Prior to 1954 the trend was not clearly defined in all provinces but last year's survey showed a decided drop in the proportion engaged in general private practice.

The reported total also included 708 doctors who have immigrated to Canada since June 1951, when a previous survey of the medical profession was made. One-third of the immigrant physicians are in private practice and most of the remainder are employed by hospitals as staff or senior interns.

The Health minister also noted that graduates of Canadian medical schools have helped swell the total number of active physicians in Canada. Nearly 900 students graduated in 1954, 54 of them from the new medical school at the University of British Columbia.

Copies of the survey, with its detailed statistics, are now available, in English and French, from the department of National Health and Welfare.

Rotation maintains pastures

Confining cows to pasture areas where they will consume the grass in one day has resulted in more efficient use of pasture. This system of pasture management has increased the feed value per acre by 26 percent compared with free range grazing.

During the past four years, states V. S. Logan, dairy cattle research officer, this system of pasture management termed "Fresh Daily" grazing has been tested at the Central Experimental Farm, department of Agriculture, Ottawa. The procedure is akin to that of rotation grazing. One advantage is that adjustment can be made in the grazing area with a set number of livestock, to allow for the variation in rate of grass growth throughout the season. This system of pasturing has been variously termed "Break" pasturing in New Zealand, "Ration" grazing in Holland, and "Close Folding" in Britain.

The management plan followed at Ottawa confines the dairy cows by electric cross fencing to an area where they consume the grass in a day. Each day an electric fence is moved forward, between the permanent fences of a pasture strip, to provide a day's allowance of fresh grass. The distance the fence is moved can be gauged by the extent the area allowed the previous day was grazed down.

To reduce the concentration of droppings stock is allowed to range back over the grazed area until the end of each week. Each week a second electric cross fence is moved up to the rear of the animals, limiting them to the day's grazing plus the previous day's grazed area. As the cows advance along the pasture strip, aftermath is allowed to recover on the initially grazed portion of the field, back of the second fence. The rear electric fence is strung in such a manner as to provide a narrow lane for the stock to return to the water supply. When the aftermath of the first grazed portion of the field has recovered sufficiently the cows are moved back to begin a repeat procedure. The unconsumed, advanced grass is cut for silage or hay.

A simple metal post to support the charged wire made from three-eighths inch iron with a flange or loop about ten inches from a pointed end is easily pressed into the ground, leaving a three-foot post above the ground. Made with this light material electric fences can be moved daily in ten to fifteen minutes.

In this system of pasture management the level of production can be maintained in spite of varying conditions of rainfall. Also surplus cured grass provides supplement during periods of poor pasture growth.

Strictly Fresh

Woman in Moline, Ill., told police that her boy friend took her false teeth. Said she hoped they'd find him because she was getting hungry. Maybe she wants to put the bite on him for a meal?

The body of Idaho state patrolmen which serves Twin Falls, Ida., area, includes a "Hand, Legg, Foote and Shue." But not two "Heads," as apprehended miscreants often claim.

There's a rumor that some enterprising promoter is making plans to televise the home

fight over whether to turn on the nightly movie or the professional fights.

As schools begin to let out for the summer, ever-increasing numbers of mothers will be looking forward to their vacation when school once more takes up in September.

Scientist foresees the day when dishes will be washed by sound waves. He must be a bachelor—that's how they get done today in many homes—wife's shouted requests impinge on hubby's ears until he does the dishes. 3146

Spaghetti Sauce Brings Eggplant to the Table in New Dress

By DOROTHY MADDOX

EVERYONE likes to try a new sauce with ever-popular spaghetti. That's why we think this savory eggplant sauce will be welcome at your dinner table.

Spaghetti With Eggplant Sauce (6-8 servings)

One-half cup butter or margarine, 1 medium-size eggplant, pared and cut in cubes; 1/2 cup chopped onions, 3 8-ounce cans tomato sauce, 1 cup water, 1/4 cup chopped, canned pimento; 1 medium-sized green pepper, diced; 1 teaspoon salt, pepper to taste, 1/4 teaspoon thyme, 2 tablespoons salt, 4 to 6 quarts boiling water, 1 pound spaghetti, grated Parmesan cheese.

Melt butter or margarine over medium heat. Add eggplant and onions and saute 10 minutes, stirring occasionally. Add tomato sauce, water, pimento, green pepper, 1 teaspoon salt, pepper and thyme.

Cook over low heat 30 minutes, stirring occasionally. Meanwhile, add 2 tablespoons salt to rapidly boiling water. Gradually add spaghetti so that water continues to boil.

Cook uncovered, stirring occasionally until tender. Drain in colander. Serve eggplant sauce with spaghetti and sprinkle with grated Parmesan cheese, if desired.

Maybe you want a soup that is a meal in itself. Served with big slices of bread and a salad, this salmon-and-vegetable soup makes a wonderfully hearty lunch.

Cream of Salmon-Noodle Soup (About 2 1/2 quarts)

One tablespoon salt, 3 quarts boiling water, 8 ounces wide egg noodles (about 4 cups), 1/4 cup butter or margarine, 1/4 cup finely chopped onion, 1/4 cup all-purpose flour, 6 cups milk, 1 7/8-ounce can salmon, drained and flaked; 1/2 cup cooked Lima beans, salt and pepper to taste.

Add 1 tablespoon salt to rapidly boiling water. Gradually add noodles so that water continues to boil. Cook uncovered, stirring occasionally, until tender. Drain in colander. Melt butter or mar-

Eggplant and spaghetti sauce is an unusual taste treat to serve the family one of these days.

gine over low heat; add onion and saute until tender. Add flour and blend.

Gradually add milk and cook until slightly thickened, stirring constantly.

Add salmon, Lima beans and salt and pepper to taste. Add noodles. Cook over low heat 15 minutes, stirring occasionally. Serve immediately.

MEMBERS OF BRITAIN'S ROYAL FAMILY head for paddock visit before running of Derby. In the foreground, Queen Elizabeth is escorted by Lord Roseberry, titled racing enthusiast. In second row, from left behind the Queen, are the Princess Royal; Queen Mother Elizabeth; Princess Margaret and the Duchess of Kent, behind an unidentified man. The Duke of Edinburgh and Princess Olga are behind Margaret.

FIERY ex-ballet dancer Lenora Davis lost her battle to save a home for her three dogs and three robin eggs. Told to give up her house near Chicago a year ago because the land was needed for a spur railroad, the 32-year-old divorcee refused to budge and at one time drove off the law with a pistol. But recently, she was bodily evicted, her home doused with oil and burned to the ground.

KEY TO THE SITUATION—Marion Merton holds out the key to the apartment at 4755 Ridgevale in which she was locked for 30 minutes when her mother accidentally locked herself out. Firemen came to the rescue.

KNOCKOUT AT SPELLING—Sandra Sloss, 13, of Granite City, Ill., the nation's spelling champion, displays a photo of President Eisenhower and herself taken after Sandra's triumph in the 28th annual Spelling Bee, held at Washington, D.C. Two-fisted audience admiring the picture in New York City is Don Cockell, British Empire heavyweight champ, who recently lost a "punchuation" contest with World's Heavyweight Champ Rocky Marciano at San Francisco.

SPACE SIGNAL: Maywood, Ill., hasn't gone space happy. The space-helmet-like antenna being installed on the traffic signal resembles that atop James Walsh's helmet, but it's designed for down-to-earth use. It picks up a radio signal broadcast by emergency vehicles, turns the signal to red. Maywood is said to be the first community in the country to equip its signal system with the new device.

CALIFORNIA-NEW YORK COMMUTER—National Guard 1st Lt. John M. Conroy is welcomed by his wife, Jeane, and their three children as he arrives in Van Nuys, Calif., after breaking three New York City's Mitchell Field and back in a record-breaking 11 hours, 26 minutes, 33 seconds. Conroy breakfasted in Van Nuys, lunched at planeside in New York City and beat the sun home by two hours and 28 minutes. His F-86 Sabre Jet maintained an average speed of 445 miles per hour on the trip.

Annual Meeting crowds at The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

The Church of Christ, Scientist was founded by Mary Baker Eddy, who discovered Christian Science in 1866 and published the Christian Science textbook, "Science and Health with Key to the Scriptures," in 1875.

FAST FELLOW — Arnie Sowell, the Pittsburgh flier, is seen setting a record for the 880-yard run at the IC-4A Games recently at New York. Arnie's time was 1:49.1. He is hailed by experts as one of the smoothest runners America ever had and sure-fire star for next Olympic Games.

Step in late for more power in your hitting

One of the secrets of hitting the ball hard is to postpone your step in toward the ball as long as you can. Most ball players step forward too soon and thus hit the ball with only the strength of their arms because their body has stopped moving forward. To get maximum power make that step into the ball as late as possible so that your whole body will be behind your swing.

Don't underrate the lob

Whenever the average tennis player has to run hard to get a ball that has been well placed and out of reach, usually his only thought is to get the ball back over the net, which he returns harder than usual.

When returning a shot that has forced you out of position the best plan is to use a lob. Place it as deep in your opponent's court as possible. Only return a shot of this type hard when your opponent is out of position.

Remember, whenever a placement from your opponent draws you well out of position use a high lob since such a shot will give you lots of time to get back into position for your opponent's next return.

Take your time between pitches

The most common fault of the average pitcher is not taking enough time in between pitches. When this is not done the pitcher works his muscles too hard and gets tired sooner than he should. He also develops extra muscle and mental tension. This is why a pitcher will so often go to pieces in the latter part of a game after looking good for the first three or four innings. He gets tired or loses control through muscle tension and this, in turn flusters him mentally. The faster you work the more excited you will get. So,

take a tip and make up your mind to take your time in between each pitch. Don't work too fast!

Hot and tired?

In the summer months athletes are up against the heat problem as well as fatigue from their efforts. One good way to take care of both problems is to drink cold tea after activity and between periods of play or practice. Cool tea with lemon and honey will cool you off and replenish your pep.

Remember—Only you can
PREVENT FOREST FIRES

WEEKLY BIBLE COMMENT

JESUS OFFERED NEW VALUES FOR OLD CONCEPTS

One cannot read far into the New Testament without realizing the great extent to which Jesus challenged many of the attitudes toward living which now, as then, prevail.

Ambition, the desire to get ahead of others, the lust for power; all these motives that so strongly influence men were present even among the Twelve Apostles.

The rich farmer, whom Jesus described in a parable, was a typically successful man. He did what almost every successful man would do; planned for bigger things, planned to pull down his barns and build larger ones, planned to enjoy the fruits of all that he had built up.

But Jesus challenged such a conception of success. For one thing, he pointed out its false economy. The man had left out the most important thing of all, his own life. But he had also left out the more important spiritual factor—he hadn't been rich toward God. And such men are legion.

It should be noted that the challenges of Jesus to what might be called dominant worldly attitudes and ways are not negative. Over against these, Jesus sets positive, constructive conceptions of a more abundant life.

What Jesus' teachings emphasize is a set of different values. How great these values are, and how thoroughly the challenges of Jesus are vindicated, can be seen in the lives of those who have been conspicuous in giving, in contrast with those whose chief aim has been getting.

It is indeed more blessed to give than to receive.

Iron-on Colors

7075
by Alice Brooks

No embroidery! Just IRON ON these lovely designs—in glowing color combinations! See how they beautify linens and towels. Ideal for bridal gifts—for yourself!

Pattern 7075: Eight washable iron-on motifs in pink, blue and green. Four "His and Hers" and four "Mr. and Mrs." motifs, with flower frames. Frames measure 4 1/4 x 2 1/4 and 7 1/4 x 2 1/4 inches.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Department P.P.L.,
Household Arts Department,
60 Front Street W., Toronto.

Be sure to write plainly your Name, Address and Pattern Number.

WONDERFUL is the word—for our NEW Alice Brooks Needlecraft Catalog for 1955. Exciting, enchanting—our new designs are all that—and even more! Send 25 cents for your copy of this terrific catalog—NOW! You'll want to order every wonderful design in it!

Live right—Eat right—Feel right

A plant uses fourteen or more foods in its growth

A plant uses at least fourteen foods in its growth. They are nitrogen, phosphorus, potash, calcium, oxygen, hydrogen, carbon, magnesium, iron, sulphur, boron, manganese, copper and zinc. Soils generally are most frequently deficient in the first three.

It is for that reason that commercial fertilizers are generally used to supply these three foods either singly or in combination. Those containing all three ingredients are known as complete fertilizers.

To most experienced farmers the numerical formula of a complete fertilizer is well understood. To the amateur gardener or those less familiar with fertilizers, it is often something of a mystery.

The figures represent the percentage of nitrogen, phosphoric acid and potash (always in that order) in each one hundred pounds of fertilizer. Thus a 100-pound bag of 10-5-10 fertilizer contains ten pounds of nitrogen, five pounds of available phosphoric acid and ten pounds of water soluble potash in the element form.

What effect do these chemicals have on the growth of a plant?

Nitrogen promotes particularly the development of stem and leaf and is required during the early stages of growth. Too little nitro-

gen results in stunted growth with yellowish foliage; too much may induce rank growth, delay seed formation and ripening, tend to make plants subject to disease, and cause lodging of grain crops.

Phosphorus stimulates root growth in the early stages and promotes seed or fruit formation in the later stages of growth. It promotes fruitfulness and in some measure hastens maturity. It is therefore, specially important when early ripening of a crop is required.

Potash is essential to the formation of the starches of potatoes and grains, the sugars of fruits and vegetables, and the fibrous matter of plants. It promotes increased yields of better quality and is particularly required by clovers and other legumes. An ample supply of available potash in the soil helps to prevent disease and to lessen the effect of excessive nitrogen.

As each ingredient has an important function in the growth of the plant and must be in balance one with the other, the analysis of the mixed fertilizer needs careful consideration and should be suited best to the plant's need. Help in the choice of fertilizer mixtures can be obtained from district representatives, experimental farms and agricultural colleges.

OPPORTUNITY

Master of human destinies am I.
Fame, love and fortune on my
footsteps wait,
Cities and fields I walk; I
penetrate
Deserts and seas remote, and,
passing by
Hovel and mart and palace, soon
or late
I knock unbidden, once at every
gate!
If sleeping, wake—if feasting,
rise before
I turn away. It is the hour of fate,
And they who follow me reach
every state
Mortals desire, and conquer every
foe
Save death; but those who doubt
or hesitate,
Condemned to failure, penury and
woe,
Seek me in vain and uselessly
implore—
I answer not and I return no
more.

—John James Ingalls

U.S. NAVY RECRUIT inherits a fortune—Francis Nidor, 13, of Great Lakes, Ill., who has been notified that on his 21st birthday he will inherit the \$500,000 estate of his grandfather, a Syrian-immigrant who died in 1947. Nidor now receives \$78 a month.

Sailing cancelled account strike

MONTREAL—The sailing from Liverpool to Montreal of the liner Ascania which was scheduled to commence May 31 has been withdrawn due to present labor conditions in the U.K., the Cunard Line here has announced.

The 20,000-ton Cunarder Samaria sailed from Southampton for Liverpool to embark the Ascania's passengers and then will sail for Quebec. Ascania's passengers for Montreal transferred to the Samaria will be brought to Montreal from Quebec by the Cunard Line.

Passengers booked to sail in the Samaria from Le Havre, at which port the liner was scheduled to call after leaving Southampton, are being transferred to the liner Homeric which sails from Le Havre for Quebec on June 5.

Helpful Hints

For really cold milk drinks freeze milk in an ice-cube tray. The frozen milk, melting in a drink won't dilute it.

Much unnecessary waste can be saved by dusting flour on meats, fish and patties from a large salt shaker.

If suits are shiny wet a thin piece of muslin in witch hazel and spread it over the shiny portion of the garment. Hold a hot iron over it until it steams. Then press on the wrong side.

Live right—Eat right—Feel right

:: APPETIZING RECIPES ::

CINNAMON-APPLE TOAST
3 tablespoons soft butter
8 slices white toast
1 teaspoon ground cinnamon
2 cups applesauce (hot)
Combine sugar and cinnamon, sprinkle about a teaspoon of the mixture over each slice of buttered toast. Place cinnamon toast on an ungreased cookie sheet.

Heat in a moderate oven (350 degrees F.) for five minutes. Heat applesauce. To serve: Spoon ½ cup of hot applesauce over 4 slices of cinnamon toast.

Cut remaining 4 slices of cinnamon toast in half, diagonally, and arrange over applesauce. Serve with pork sausages. Yields 4 servings Cinnamon-Apple Toast.

BOZO

Most animals are born with built-in swim-ability

"Ol' swimming hole" time is approaching for the Canadian boy, one of the few water-loving North American mammals not a born swimmer.

While hundreds of thousands of youngsters must go through a learning period of thrashing clumsily about in river, lake, ocean surf or pool, less resourceful lower animals seem to have built-in swimming ability. Most land animals, when the need arises, can propel themselves in water, some with agility, some awkwardly.

The hare and hedgehog sometimes take voluntarily to water, says the National Geographic Society. The mighty moose swims well. Bats can hold up on watery surfaces. Ermine navigate proficiently.

Monkeys can bathe

In Puerto Rico a colony of monkeys bathes along the seashore, and in Washington some years ago, an escaped monkey plunged into the Potomac river and eluded a pursuing rowboat for more than an hour.

Rivers present no problem for the 15-pound Texas armadillo. The armored beast swims wide creeks but walks across the bottom of narrow streams.

The star-nosed mole, with its 22 fleshy tentacles, has a flair for aquatics, occasionally moving under ice. A resident of Canada and the United States, the restless mole swims among flooded cattails and probes the ground for worms.

:: GEMS OF THOUGHT ::

LITTLE THINGS

To a great mind, nothing is little.
—Conan Doyle

Trifles make perfection but perfection is no trifle.—Michelangelo

Every difficulty slurred over will be a ghost to disturb your repose later on.—Frederic Chopin

Seeing that we have to attain to the ministry of righteousness in all things, we must not overlook small things in goodness or in badness, for "trifles make perfection," and "the little foxes . . . spoil the vines."

—Mary Baker Eddy
If takes less time to do a thing right than it does to explain why you did it wrong.

—Henry Wadsworth Longfellow
Nothing is particularly hard if you divide it into small jobs.
—Henry Ford

Lead is the end product of several types of radioactive decay.

The browniest lifeguards can't compare with a polar bear in water. Occasionally, after the seasonal retreat of ice, the big white bears are seen in open sea far off the Labrador coast. A wounded female once swam from danger while shielding a cub twice the size of a Newfoundland dog between her forelegs. One ship's company watched a bear climb an upturned ice pan, lie on its side and slide 40 feet head-first to a watery splash.

Other stout swimmers

The solitary mink is equally at home raiding thickets and hen-houses for food or seeking its fill with utterlike ease under water.

But such compatibility with water isn't shared by the skunk. Only infrequently does it swim streams or rivers voluntarily—motivated probably by an urge for new feeding grounds.

Barren ground caribou swim the Yukon in such numbers their antlers suggest strange growth waving in the water. Otters, like many swim-loving people, perform acrobatics, sliding down steep banks into the water.

In sharp contrast, one authority points out that the gorilla, large gibbon and chimpanzee live a high and dry life. None can swim. The gibbon won't even lower its head to drink, preferring to dip its fingers. Why water bothers the gorilla and chimpanzee is one of Nature's mysteries.

Quick Canadian Quiz

1. What famed pirate is supposed to have buried treasure on Nova Scotia's Oak Island more than 200 years ago?
2. Of the 154,000 immigrants who entered Canada last year how many were classed as workers?
3. Since 1939 spending by the provincial governments combined has increased about 5 times. By how much has federal spending increased in the period?
4. Which of the provinces has the smallest area of occupied farmland?
5. What proportion of the Canadian labor force is employed in agriculture?

(Answers in another column)

On The Side : By E. V. Durling

In addition to the boos and Bronx cheers losing jockeys get at the track, they also receive complaints by mail. That great jockey, George Woolf once received the following letter from an indignant feminine horseplayer. "My beautiful wrist watch is now in the pawn shop. Why? Because you lost the fifth race yesterday on the favorite. Shame on you!" Mr. Woolf, a very gentlemanly and highly intelligent fellow replied, "Dear Madame: there are 67 ways the favorite can lose a horse race. Over 62 of these a jockey has no control."

A popular combination

The idea of the frankfurter and roll, including the popular shape of the roll, originated in Germany. It was first introduced to the U.S. in Brooklyn by Charles Feltman in 1871 at his Coney Island restaurant. However, Tad Dorgan, brilliant cartoonist did more to popularize the frankfurter and roll than Feltman. When it was introduced at sports events, Dorgan nicknamed the combination "the hot dog."

Extending age limit

People past 40 who want to look young and feel likewise should stay in bed one full day in each month. That's what the experts on the subject maintain. It is also advised that seekers of an extended period of youth should wear young looking clothes, sleep in the raw, get nine hours of slumber nightly and fast one day in each month.

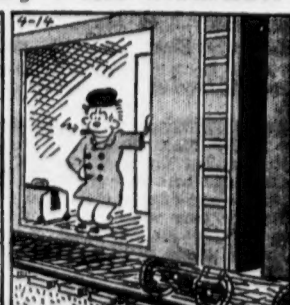

Forgotten feat

"Babe" Ruth's great record as a home run hitter has caused some of his remarkable achievements as a pitcher to be forgotten. "Babe" when pitching for the Boston Red Sox once struck out Ty Cobb, Sam Crawford and Bobby Veach in succession. That was when that trio of heavy hitters was known as "murderers' row."

Pork pays off

Ten thousand dollars for a pig. That's the price recently paid in England for a prize porker bearing the fancy name of Landrace Bluegate. Pig breeding can be a highly profitable enterprise. The "Landrace" breed of piglets can bring from \$1,000 to \$2,800 right after birth. Sir Winston Churchill goes in for a bit of pig breeding at his country place. So does Don Cockell, the heavyweight boxer.

OUR COMPLETE SHORT STORY—

Circus parade

By CHARLES DORIAN

GALA was the day when the colossal circus parade came along the city's main street led by the steam calliope. People were warned to leave their cars at home and walk to vantage points. The warning went unheeded by many.

One big sedan stopped halfway between streets to let off a good-looking woman dressed in a grey ensemble. The driver, a middle-aged man in tweed suit, said to her as she alighted:

"Just walk along for two blocks and a half and you will be very close to your seat. I'll turn up this next street and look for a place to park the car. Then I'll join you."

"All right, I'll hold your seat for you," she replied.

She beat him to the corner because of the traffic jam. As she stepped down from the high curb she slipped and fell in a heap on the pavement. The man had just started to enter that street, calculating the turn after she had crossed. Now he jammed on the brake. She recovered her balance quickly. He spoke through the open window:

"Are you hurt?"

"No, I'm all right," she said, adjusting her hat.

An angular fellow came up to her and tipped his hat.

"Madam," he said, "I saw the whole thing. It's lucky you weren't killed. Probably severely bruised at that, to say nothing of the humiliation and the damage to your clothes. You should sue this reckless driver!"

The lady looked disturbed. "Oh, I wouldn't do that," she exclaimed.

"Here, officer," the man beckoned the director of traffic. "That driver knocked down this pedestrian as she was crossing the street. How about it?"

"I have his number," said the policeman, writing in his book. "Your name, sir," he asked the driver, deferentially.

"Devlin," said the man, palpably shaken by this turn of events. "James Devlin, 545 Riverview Avenue."

"And yours?" he asked the lady.

"Nettie McIvers," she replied, with a twinkle in her blue eyes as she flashed a signal to her late companion. "The address is 543 Riverview."

"Oh, neighbors, eh?" cut in the tall man. "Here's my card, Miss McIvers. The name is O'See. I specialize in automobile accident cases. I'll call tomorrow morning and bring my brief of the case for your approval." He lowered his voice and leaned over to whisper: "Better affect a limp as you walk away."

The man in the car recovered his composure, and as he turned the corner, grinned at the officer and the crowd which had assembled. He was confident that even a crooked lawyer could not get very far in making a "case" out of that incident.

Next morning O'See was on hand at 543 Riverview. It was a spacious property with a lovely garden. The cottage was cozy looking in its beautiful setting. Nettie herself answered the doorbell.

"Ah, good morning, Miss McIvers. Feel a bit shaken up, don't you? I'd expected you'd be in bed suffering from shock. Now, there's no reason why you cannot claim a thousand dollars for injuries sustained, plus the humiliation and damage to your clothes. It is my guess that Mr. Devlin will be glad to settle out of court. He has a wife and family, I take it?"

"He has a wife but no family and I doubt very much if he will settle out of court. He is a fighting man," she essayed.

"No need to worry about that. You're a fighting woman, too. And O'See is a fighting lawyer. Did you see the parade all right?"

"Oh, yes. We had a splendid seat in the bleachers they erected for the occasion."

"Too bad. You see if you hadn't seen it as you had set out to do we might have added that in the claim for damages."

"Mr. Devlin did not see it," she volunteered, significantly. "It took so long to get his car parked."

"H'm! So you've seen him since the accident? On pretty good terms with him, eh?"

"Oh, yes. I wouldn't quarrel with Mr. Devlin for anything."

"No? I see. Well, you don't have to. We'll claim against the insurance company. Somebody's got to pay for these accidents. I think I'll go and see Devlin. Might simplify the case. I'll want the name of his insurance company and some other details. Must live next door. Number is 545."

"Oh, yes, just the other side of that shrubbery. Just follow the path," directed the woman, smiling.

"H'm! Don't you have fences down this way?" asked the man.

"Don't need them," she said. "You'll see the number, 545, on the house. Don't fail to come back and tell me what he thinks of lawsuits."

He came back in a rage. She thought he would. She had stood behind the closed door to watch.

"That number," he choked. "No. 545 is just a big doghouse. A mastiff on a chain made for me when I looked at the number."

Mr. Devlin came into the hall at that moment.

"Sorry, Mr. O'See," he grinned. "This lady has a lively sense of humor—in fact we both have. She probably misled you by giving you her maiden name. We've been married a year!"

O'See tapped his head a couple of times and departed muttering.

International airport opened at East Poplar

REGINA. — An international airstrip along the Saskatchewan-Montana border was officially opened Sunday, June 12, at the East Poplar, Saskatchewan port of entry.

The airstrip, 3,000 feet long and 120 feet wide, will be large enough to handle any aircraft up to a medium size twin-engine plane.

The airstrip is within 50 yards of both the American and Canadian customs houses. One of the advantages in having such an airstrip is the fact that both customs offices can be cleared in one landing, Mr. Burton said.

The new border airstrip is expected to do a lot to encourage the air travel of Americans into Saskatchewan. Many of the inconveniences which formerly hampered pilots of private planes in coming north of the border will now be eliminated.

The airstrip is the result of a recommendation of the International Northwest Aviation Council which met in Vancouver in September of last year. Montana State Aeronautics director Frank Wiley, was the American official instrumental in having the airstrip constructed.

The Saskatchewan Air Ambulance Service was represented at the opening with a plane piloted by the supervisor, D. N. Campbell. Fred Nagel, instructor at the Regina Flying Club, and municipal and urban officials in Saskatchewan towns in the vicinity have also been invited to attend.

Saskatchewan has another international airstrip located at the Estevan highway border port.

So called lead pencils originated in England about 1560.

Alberta Golden Jubilee Anthology by 100 authors

The Alberta Golden Jubilee Anthology is a significant cultural event. Contained within its gold and green covers, in articles, fiction and poetry, is the work of approximately 100 Alberta authors and more could have been included if the plan of the book had permitted.

The Anthology is divided into seven sections. The first four present the story of Alberta in a series of impressionistic pictures. "The Romance of Yesterday," the first section, describes Alberta up to 1905, including the Indians, the first white men, the arrival of the Mounted Police, and the stories of early missionaries, ranchers and farmers.

The period from 1905 to 1945 is described in the second section, "Our Changing Year." The Alberta of today, its education and health services, its hunting and fishing, its parks, art, music and drama are portrayed in the third section, "The Alberta Scene."

The Golden Decade

No description of any province would be complete without a glimpse of the economic structure and "The Golden Decade," the fourth section, provides this. Section four tells of ranching and farming, of the great natural resources, of oil and natural gas, and the industries, old and new.

In the first four sections, there is a dramatic and colorful view of the Alberta of past, present, and future, with the courage, optimism and pioneering spirit of the people connecting all with a strong theme. Obviously, no detailed descriptions of Alberta could be presented in one volume but the articles cover the highlights of Alberta's greatness.

In appearance, the Anthology is attractive. Its cover has a spine in gold foil and the title is gold on a dark green background. It contains 12 color photographs, 16 half-tone photographs and full-color reproductions of the eight prize-winning paintings by Alberta artists. The appearance is further enhanced by a number of full-page illustrations as well as 50 chapter-heading illustrations by H. G. Glyde, R.C.A. The type has been selected for easy reading.

The Alberta Golden Jubilee Anthology is a book every Albertan will want, both as a memory of the Jubilee Year and as a book of permanent interest and literary quality.

Canada's most valuable postage stamp is the twelve-penny black, issued in 1850 and now priced at \$3,500. 3146

How To Hold FALSE TEETH More Firmly in Place

Do your false teeth annoy and embarrass when you eat, laugh or talk? Just sprinkle a little FASTEETH on your plates. This alkaline (non-acid) powder holds false teeth more firmly and more comfortably. No gummy, gooey, pasty taste or feeling. Does not sour. Checks "plate odor" (denture breath). Get FASTEETH today at any drug counter.

BOY SCOUT ACTIVITIES

Continued from front page
2nd, and those that have been before know the ropes. The newcomers to the joys of camping, poor souls, know not what they are in for. May heaven help them.

The Cubs go to camp on July 12th. I feel sorry for them too. I feel most sorry for myself, however, as the job of looking after the boys is a busman's holiday, and my pay is nothing a day, and I am charged full fare for eating half as much.

The Scouts Visitors' Day is on Sunday the 10th any time after 2 p.m., and all of you who would like to see the boys and their camp are asked to bring your own cup, teaspoon and food. We provide tea and coffee (unless the prices rise some more, in which case we will heat creek water for you and charge 10c a cup).

Would any energetic mothers (or fathers) be so kind as to cook up a batch of cookies and bring them down for the boys? If you prefer to provide a cake, please have your name on the bottom of the plate, and make sure that

the ingredients are pure as the boys are very delicate.

The camp site is very close to where we camped last year. Go to the bottom of the Dry Canyon at Dunphy, and at a gateway at the bottom of the hill will be a sign marked "Carbon Boy Scout Camp". Merely follow the trail, and if you get lost, we will send out the bloodhound. Make sure that you have some fish in the trunk of your car that the hound can smell.

Incidentally, the boys behaved very well at the Church Parade to the United Church on Sunday, June 26th. The little Cublets had to stretch their legs when marching, while the Scouts did the heel-and-toe to give the Cublets a chance.

CANADA MAKES GOOD RECOVERY FROM 1954 SLUMP

Reviewing Canada's economic activity thus far in 1955, the Bank of Montreal, in its June Business Review dated June 23, finds confirmation of earlier signs of recovery from the 1953-54 recession with the mining and construction industries 'starring' in the leading roles on the economic stage. This month's review

expresses some disappointment, however, in the unemployment situation, but sees increased manufacturing production as providing the "seeds" of continued expansion in employment during the summer.

Canada's economic resurgence, the B of M notes, has, like the recession preceding it, been neither as broad nor as dramatic as that of the United States. U.S. industrial production in March was 8.7 per cent higher than in the previous March, compared with a rise of 5.8 per cent in Canada. Britain's production has also risen more rapidly than Canada's.

Nevertheless, this country has benefitted from the growing demands for goods and services in the U.S. and the U.K.—particularly in the latter. In the first four months of this year, exports to the U.K. have risen 46 per cent over the like period in 1944. Canada's total exports for the same four-month period are up 12 per cent over a year ago.

Partially offsetting the rise in exports has been an increase of almost eight per cent in imports over the corresponding period last year. The rise was due almost entirely to increased buying from the U.S. causing an upswing in the deficit with the U.S. to \$237 million. Canada's surplus with the U.K., on the other hand, climbed to \$136 million.

Turning to retail trade, the review states that, during the first three months of this year, sales are almost the same as for the corresponding period in 1954. In Manitoba, Saskatchewan and Alberta, however, sales were down six per cent, 14 per cent and two

per cent respectively.

Manufacturing production showed disappointingly small gains in January and February, but

there was a marked improvement in March when the official index rose three per cent above March, 1954. More recently there has

You get protection at cost and share in the Board's surplus earnings with Alberta Hail Board Insurance.

The Policyholders are its only shareholders. Being a Farmers Mutual Insurance plan, the Board distributes its yearly surpluses to policyholders as dividends. Also, you are guaranteed a cash refund of at least 5% if your premium is paid in cash and you make no claim.

Your premium is a deductible expense for Income Tax purposes.

Safety Sam Says...

Don't Straddle the line

Holding up traffic Both lanes!

speed of traffic, make it a point to keep well over to the right.

Straddling the centre strip or the lane marking is a most aggravating discourtesy to the motorists following behind. Just as provoking are the dawdlers who hog the left-hand lane when they should move over to give the right-of-way to permit moving traffic to proceed freely in the left-hand lane.

If you are sight-seeing or proceeding slower than the normal
